### SUMMARY

Seeking career as a Web Developer, using my knowledge of React and Javascript. I appreciate creating user friendly websites and looking forward to working on exciting projects. I am interested to learn more and perform well.

### SKILLS

React	Java	MS Office
HTML/CSS/JS	C++	Power BI
Tailwind CSS	Python	SQL

### EXPERIENCE & PROJECTS

Xardent Technologies, Web Developer

6 Months Experience

- Created dynamic web interfaces using React and integrated RESTful APIs for seamless user experiences.
- Collaborated with the team to improve performance, ensure mobile responsiveness, and maintain clean code architecture.

Unified Mentor, React/React + Firebase Projects

3 Months Internship

- Built React and React + Firebase - based projects focused on modular architecture and clean UI.
- Developed both frontend components and backend API integrations.

Cosmos Creative Academy, Web Developer

Client Project

- Created a responsive website using React in collaboration with a teammate.
- Focused on layout structure, routing, and component-based architecture.

MOZART, E-commerce Art Gallery

Final Year Project

- Developed a MERN-based e-commerce art gallery with bidding functionality on the auction page.
- Handled user authentication, product listing, and dynamic bidding logic.
